2

Compiling a supplier questionnaire

3

Measure scope 1 and 2 emissions via "Klimaklar"

# 2024

KKP scope 3  
Producers scope 1 and 2

4

Gather supplier data from producers

5

Measure Scope 3 impact through the upstream supply chain to meet GHG protocol standards

6

Work on supply chain emissions reductions, and set in motion a process to drive continuous supplier improvement

# What do we offer?

KKP Adviser & Produktion helps to implement sustainability reporting and sourcing improvements for Danish SME's. Investors and customers are asking for it and new requirements via the CSRD directive is coming from the EU.

## The green data strategy

Sustainability strategy to reduce CO<sub>2</sub> emissions and accelerate value creation in the supply chain.

We use baseline analysis and sustainability data to implement better sourcing.

## ESG gap analysis

Gap analysis and review of where you need to focus your work with sourcing data required in the CSRD directive.

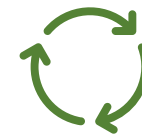

We provide the necessary hands-on expertise and help handle the relations with suppliers well.

## ESG risks assessment

Assessment of current ESG risks in the supply chain of your company.

We support you to understand what is important and keep one step ahead of regulations and mitigate risks.

## Supply chain analysis

Data gathering and calculation of scope 3 emissions for documentation purposes and emission improvements.

We help understand where your company 'stands' with its current value chain, and we help benchmarking suppliers.
